Azure Brands

THE PRODUCTS IN THIS CATALOG meet a high threshold for quality. Azure Standard requires transparency from all the companies we work with, and we only choose suppliers that produce real foods and items made with only natural ingredients. That means you get nutrient-rich foods that are minimally processed with no artificial additives, no preservatives, Non-GMO, no MSG, no artificial colors or flavors. That doesn't mean every item is organic. Some are made with organic ingredients but are not Certified Organic. Some go far beyond organic. They all are earth-friendly, Non-GMO and meticulously chosen for their healthful qualities.

AZURE REDUCES WASTE AND SAVES YOU MONEY by connecting directly with independent growers and producers. Once you place an order, our warehouse team in Moro, Oregon pulls your items off the shelf just like a personal shopper. Your items are then packed in recycled boxes under your name, and your parcels are put on a truck that delivers straight to you. You're a part of the Azure family in your own neighborhood, regularly gathering to collect deliveries.

IT'S ABOUT MORE than getting healthy food at great prices on thousands of products. It's an experience. An idea. A belief that the current model of food production has failed, and together we are focused on building a new one. It's a free and independent supply chain where you get life-giving products delivered directly from the producer to you. No middleman, no grocery store overhead, no long lines to shop or pay. Azure is a choice that puts you in charge of your family's health. It's convenient, healthy and sustainable.

Easily find organic items by looking for the leaf icon next to each listing. Items that are not organic are still Non-GMO and fit Azure's strict product standards for purity.

ON THE COVER: Azure Market Organics fresh vegetables.

A Family Tree Rooted in Organics.

For generations, our family has shared a deep-rooted passion for clean, healthy living. We believe that organically grown foods are essential to nurture a long and satisfying life. We'd like to see more farmers and home gardeners turn to organic growing practices for the generational health of our families

and longterm sustainability of our environment. We are committed to supporting the organic farmer and providing a wide variety of organic products for families and individuals across our country. We'll continue for generations to come. It's who we are and what we do.

Today, we deliver organic products to families all across the United States.

A Z U R E

We are a multi-generational, independent family business committed to organic farming since 1973.

What is Organic?

Organic The USDA Organic label means farmers and handlers document their processes and get inspected every year. On-site inspections include seed sources, soil conditions, crop health, weed and pest management, water systems, inputs, contamination and commingling risks and prevention, and record-keeping. Oregon Tilth Organic Certification meets standards in Europe and Canada as well as the US.

Non-GMO Genetic engineering is expressly prohibited in organic items. Producers do not use genetically modified seeds or other materials when planting crops. Producers implement preventative practices that effectively buffer their farms from GMO contamination.

Healthy Soil Produce must have grown on soil that had no prohibited substances applied for three full years prior to harvest.

Natural Ingredients Foods do not contain artificial preservatives, colors, or flavors and all ingredients are organic, with some minor exceptions, like enzymes in yogurt, pectin in fruit jams, or baking soda in baked goods.

Well-treated Animals Organic meat and dairy comes from animals raised in conditions that accommodate their natural behaviors. Animals are raised without hormones or antibiotics, and graze on pastures grown on healthy soil.
